

1 NO POVERTY

Through our partnership with DFID we empower communities to better manage the oceans, forests and rivers that they rely on. This will directly benefit 800,000 poor women and men.

2 ZERO HUNGER AND SUSTAINABLE AGRICULTURE

Our Food Security report highlights the huge risks to business, people and planet if sustainable access to nutritious food isn't secured. It pinpoints how businesses can work together towards common goals.

3 GOOD HEALTH AND WELLBEING

Through our Livewell Principles we promote healthy and sustainable diets. We show consumers how simple choices and changes to their diet can make a positive difference for both people and planet.

4 QUALITY EDUCATION

Our Green Ambassadors scheme encourages a new generation of UK sustainability champions in schools, helping children learn about the vital role that the environment will play in their futures.

5 GENDER EQUALITY

On Mafia Island, Tanzania, we've implemented a scholarship scheme that helps women and girls complete their primary, secondary and tertiary education.

6 CLEAN WATER AND SANITATION

Our Kanpur Leather Buyer's Platform supports businesses to reduce pollution of the Ganges caused by leather production. The Ganges provides water to over 500 million people.

7 AFFORDABLE AND CLEAN ENERGY

Our coal campaign helped convince the UK government to become the first to commit to phase out coal by 2025.

8 DECENT WORK AND ECONOMIC DEVELOPMENT

Our Greener Budget report shows that the UK could improve the economy's resilience, create new jobs and accelerate green technology development by managing its forests, rivers and seas responsibly.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Our HQ – the Living Planet Centre – is at the forefront of sustainable design and construction. From underground heat pumps to solar panels, we've created the greenest building we possibly could.

10 REDUCED INEQUALITIES

In east Africa we're supporting small-scale loans that enable communities to save and invest in their livelihoods. In southern Tanzania this has benefited more than 23,000 people.

11 SUSTAINABLE CITIES AND COMMUNITIES

We're working with investors to prevent extractive activities in natural world heritage sites that many communities depend on. We're campaigning for a global transition to clean, sustainable businesses.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

We work with businesses to make soy, beef, palm oil, timber, fish and leather production more sustainable. Our scorecards and certification schemes enable consumers to make more sustainable choices.

13 CLIMATE ACTION

We're calling on the UK government to tackle climate change and build a low-carbon economy. In 2015, we rallied 80 UK businesses to support our call – including Kingfisher, Unilever and M&S.

14 HEALTHY AND PRODUCTIVE OCEANS

Our Living Blue Planet Report highlights the fragile state of the oceans. It sets out practical steps the public and government can take to restore marine biodiversity.

15 LIVING ON LAND

Our Amazon partnership with Sky has saved one billion trees and enabled 1,500 families to farm sustainably. It exemplifies how we work to build a future where people and nature thrive.

16 PEACE AND JUSTICE STRONG INSTITUTIONS

The Legal Response Initiative, which we co-founded, provides legal support to developing countries that are most vulnerable to climate change. It's creating a more level playing field in climate negotiations.

17 PARTNERSHIP FOR THE GOALS

Our global reach means we can bring together governments, businesses and local communities. We co-chaired Beyond 2015 UK and we've set up a multi-sector network to deliver the SDGs in the UK.

WWF-UK is working to implement the Sustainable Development Goals at home and overseas. For a future where people and nature thrive.
