

### **RESOURCE SHEET 1: I have everything...**

Draw three concentric boxes like the ones below onto a large sheet of paper.

Think about the things that Teodoro consumes and where these things come from, for example food, drink, clothes, shoes, medicines, toys for his children...

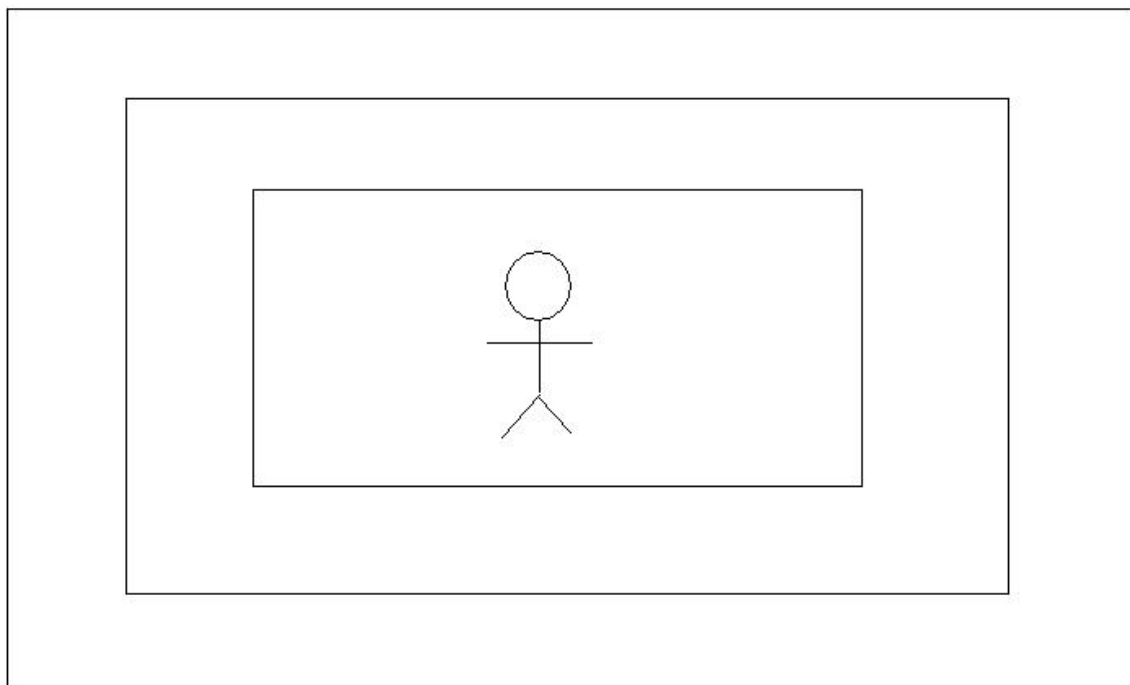

Record those things that are locally produced in the box in the centre of your diagram.

Record those things that come from further away in the next box.

Record those things that come from a different country in the outside box.

Draw another set of concentric boxes and use the diagram to map out the things that you consume.

#### **Teodoro's lifestyle**
