SCOTLAND

MANIFESTO

WWF HAS A VISION FOR A ONE PLANET SCOTLAND.

10 Manifesto Commitments for 2011

1. By the end of 2011, introduce a street-by-street, house-by-house retrofit scheme across Scotland, with every house given a whole-house plan and basic measures installed by 2015.
2. Ensure that renewables meet 60% of Scotland's electricity needs by 2015, rising to an annual average of 100% to comfortably exceed our electricity needs by 2020.
3. Within 6 months, transfer at least 10% of the transport budget to deliver active travel infrastructure.
4. By 2011, commit to a national economic development purpose that improves quality of life, reduces our global footprint and delivers a zero carbon future.
5. By 2011, start implementing a plan to secure replacement of 300,000 cars in Scotland with electric vehicles by 2020.
6. By 2014, put in place the regulations to establish minimum energy efficiency standards for all private housing to move all F and G rated properties up the scale by 2015, and E rated properties by 2020.
7. By 2012, require all public bodies to purchase only accredited sustainable seafood and palm oil through responsible procurement policies and practice.
8. During 2011 and 2012, take a strong lead in the CFP reform discussions and negotiations, securing strong conservation outcomes based on long-term management plans at fisheries level.
9. By 2015, ensure all Scottish schools are One Planet Schools - schools that practise and teach sustainable development.
10. By 2013, introduce a nationwide drink container deposit return scheme.
